

YAMALUBE®

Yamalube® created by Yamaha

Engineering is at the heart of everything we do at Yamaha, and we believe that oil is the lifeblood of our vehicles.

That's why Yamaha developed Yamalube® – a range of oils, lubricants and care products designed to help you get the best experience from your Yamaha motorcycle, scooter, ATV, snowmobile or other Yamaha land product.

We want every journey you make to be filled with excitement and satisfaction, and Yamalube® helps to keep that spirit alive.

Built for performance

Yamaha vehicles are built to the most exacting standards, for the best results on the track, on the road and off-road. With countless racing victories, Yamaha vehicles have, time and again, proven their class-leading performance and reliability.

Wanting the best for our products, Yamaha's engineers found that conventional engine oils couldn't provide the performance and protection to meet their high standards.

The Yamalube® oil series was developed to be the perfect oil for each vehicle in the Yamaha range. Yamalube® engine oils are made from a combination of base oils, additives and solvents, chosen and mixed to work perfectly for your vehicle.

Yamalube® was designed by Yamaha engineers to work in harmony with the vital mechanical components of your vehicle. Yamaha recommends nothing else.

YAMALUBE®

The best oil for your Yamaha

The Yamalube® advantage

Because Yamalube® has been designed by Yamaha's engineers to work with Yamaha engines it offers a number of benefits over regular, off-the-shelf oils.

- Designed for exceptional engines**
 Yamalube® is designed to work under the most extreme conditions – like in the new 200 PS, 1,679cc V4 engine in the 2009 VMAX. Selected products in the Yamalube® range are designed for oil-immersed ('wet') clutches and are compatible with catalytic converters.
- Faster gear changes, longer life**
 Yamalube® oils' high film-strength protects your engine and gearbox enabling faster gear changes and ensuring a longer life for your engine.
- Meets JASO MA standards (selected products)**
 Oils that are JASO (Japanese Automotive Standards Organisation) MA certified resist clutch slippage, do not leave ashy deposits, and meet anti-corrosion and wear standards.
- Anti-corrosion and anti-foam**
 Anti-corrosion and anti-foam features ensure maximum protection of the engine's internal components at high-rpm speeds.
- Lubrication**
 The blend of oils and additives in Yamalube® oil minimise frictional loss for high performance, while protecting against ring wear and piston scuffing.
- High temperatures**
 As engines get hotter, oil temperature can exceed 160°C, putting every part under heavy strain. Yamalube® oils are designed to resist breakdown in such extreme heat.
- Sealing**
 Yamalube® oil forms a seal between the piston rings and cylinder wall, preventing pressure leakage from the combustion chamber and keeping the compression ratio stable, for a more efficient engine.
- Stress dispersion**
 Impurities like dirt and abrasive powder can build up inside engines and affect performance, Yamalube® oil disperses them in the form of small particles to keep the oil flowing smoothly.

The Yamalube® engine oil range

Yamaha land vehicles are designed to meet the differing needs of their users. In line with these needs a range of dedicated oils has been developed.

4-STROKE FULLY SYNTHETIC ENGINE OIL for high-performance bikes and competition engines. 15W-50 for even greater resistance at high temperatures and under stringent conditions such as hot weather, high revs or track days.

4-STROKE SEMI-SYNTHETIC ENGINE OIL a unique blend for all road bikes in normal conditions. 20W-50 reduces oil consumption and is ideal for high mileage and big-bore engines.

4-STROKE MINERAL ENGINE OIL premium quality, suitable for any 4-stroke engine used in normal conditions. 20W-50 reduces oil consumption and is ideal for high mileage and big-bore engines.

2-STROKE SEMI-SYNTHETIC ENGINE OIL for 2-stroke engines. Suitable for standard or unleaded petrol engines.

4 STROKE			2 STROKE	
YAMALUBE® 4-FS FULLY SYNTHETIC	YAMALUBE® 4-S SEMI-SYNTHETIC	YAMALUBE® 4-M MINERAL	YAMALUBE® 2-S	
10W-40 1 L	10W-40 1 L	10W-40 1 L	1 L	
10W-40 4 L	10W-40 4 L	10W-40 4 L		
15W-50 1 L	20W-50 1 L	20W-50 1 L		
SNOWMOBILE		4 STROKE	2 STROKE	
		YAMALUBE® 4T	YAMALUBE® 2T	
Engine oil for Yamaha snowmobiles designed to withstand low temperatures. Semi-synthetic 2-stroke oil for 2-stroke Yamaha snowmobile engines and fully synthetic 4-stroke oil for 4-stroke engines and 2-stroke gearboxes.		0W-30 1 L	1 L	
		0W-30 4 L	4 L	

Please refer to your Yamaha Owner's Manual to determine the exact Yamalube® viscosity/grade for your vehicle. Contact your Yamaha dealer for more detailed information or search our website: www.yamaha-motor-europe.com/yamalube

Yamalube® care products

To help further maintain your Yamaha land vehicle, there are a number of Yamalube® care products available. Contact your Yamaha dealer for details.

Also see your Yamaha dealer for details of Yamalube® Marine products.
